

Sometimes Off- The-Shelf Solutions

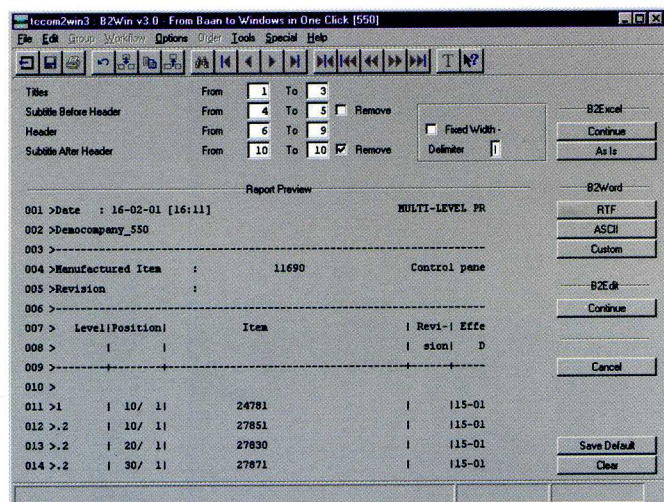

Are Simply... Better

You did not write the ERP system you are using today..
There is no reason you should develop utilities for it.

B2Win - The Server version

This best selling product from Nazdaq became the ultimate utility for taking output from Baan to Excel and Word. It is installed at hundreds of servers in more than 30 countries.

B2Win is fully installed on the Baan Server, and there is no need to install it on every single PC in the organization. **B2Win** is a Baan Tools session that downloads the report output from the server to the PC, while copying an Excel or Word Macro to your PC. This Macro is responsible for cleaning the report output and formatting it in a way that it can be used in Excel and Word.

B2Win 3.0 has been revised to match almost any Baan Report with a standard looking layout. It is a result of testing on hundreds of Baan standard and customized reports.

New in B2Win 3.0

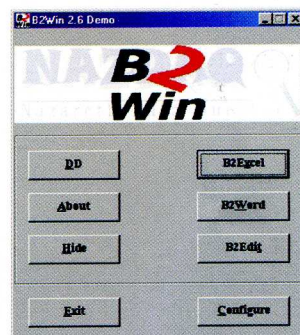

- Better handling of multiple-title reports in Excel
- Data Dictionary feature for better converting of Leading Zero and Date columns

- Saves your report parameters
 - Makes it possible adding Logo to Word Documents
 - Makes it possible for a unique Macro per Word document
- The server version of B2Win works for Baan IVc and higher.

B2Win - The Stand Alone Version

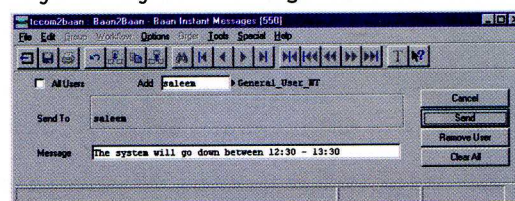

This version of B2Win was developed for Baan IVb or earlier versions and for companies that do not wish to deploy B2Win for all users.

The Stand Alone Version includes the same functionality as the server version. It is installed on the local PC and does not require any Baan Tools expertise to install it.

Baan2Baan Baan Instant Messenger

This utility allows system Administrators to send an instant message to all users logged into Baan. This utility is very useful in case of an un-scheduled shut down, MRP run, or any other system message.

Baan2Baan works for Baan IVb and higher on Unix installations only

B2Email - The Standard Version

This easy to use utility allows you to send Baan Reports by email in RTF, ASCII or BW formats. The Acrobat version allows PDF and CSV formats too.

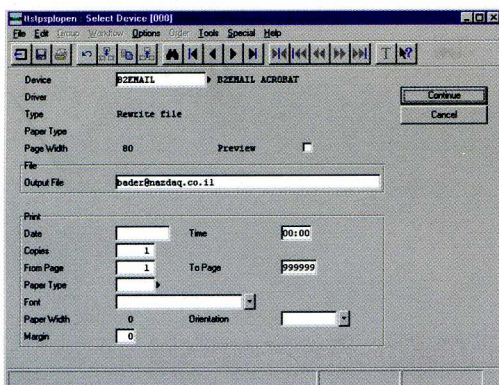

This version of B2Email is ideal for reports run in nightly jobs. B2Email Works in two modes:

Manual

Once a report is sent to device B2Email, you indicate the email address of the user that will be receiving the report. When the report finishes processing, it will be sent to the user.

Automatic

The B2Email broker defines for each report what email addresses should be receiving it. Once a report is sent to device B2Email, it will be sent to the proper recipients automatically.

Sending reports from Baan has never been so easy.

B2Email - The Mail-Merge Version

This utility allows you to send your Baan reports and documents by email to your business partners in one click.

There is no need to print your Purchase Orders, Sales Order Acknowledgments, Invoices, Statements and then Fax them. All you have to do is run the session to print these documents, and each document will be sent to the proper recipient in PDF format. Baan documents can be sent directly from Baan by email as PDF files with or without company Logo.

A smart broker is defined for each Baan output. All you need to do is define email addresses for all customers and suppliers. Once all is in place, your documents can be sent around the world by just one click.

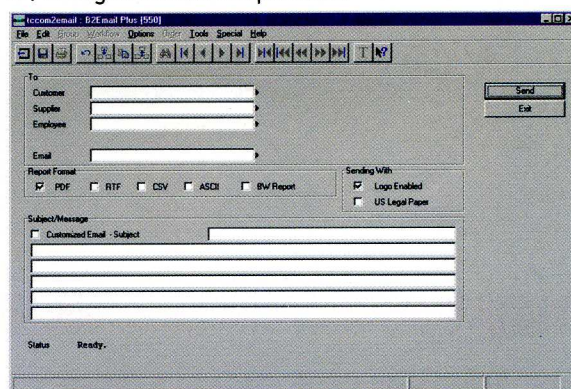

B2Email - The Plus version

This Interactive utility allows Baan users to send Baan output by Email to customers, suppliers, employees and others at the Global Address book - All defined in Baan. Reports can be sent in PDF, CSV, RTF, ASCII or BW formats

A Baan Session maintains Customer / Supplier Email address (Can be imported from Excel)

Your Company Global Address book can be imported from Outlook or Lotus into Baan.

A4 or Legal formats are possible.

- Messages can be sent to Outlook/Lotus/Netscape or any other Email system.
- Emails are sent using SMTP or sendmail.
- The message subject is the report name.
- Landscape and Portrait reports.
- Your Company logo can be added to RTF and PDF documents.
- The message is automatically signed by the user data.
- The system keeps logs of all email messages sent via B2Email.
- RTF reports sent from Baan are adjusted to fit MS-Word.
- CSV reports sent from Baan are converted using B2Win compiler.
- PDF reports are adjusted to fit Acrobat Reader.

Success Stories

"Our PC users were asking for their Baan IVC3 reports in MS Excel, Word, Outlook and other PC formats and wanted to be able to distribute these reports via Email, LAN or our Internet/Intranet Web Site. Baan did have bits and pieces of it, but only using Nazdaq's **B2Win** and **B2Email** applets we were able to pull everything together as a unified output solution. Using **B2Win** and **B2Email** we eliminated the manual re-keying of reports, freed up users from repetitive report processing tasks, allowed them to extract headings and report break information, and saved dollars by reducing paper costs and reducing the time spent to process a report into meaningful data. Product installation was a breeze, support is excellent, and our users love it!"

Daniela Zaporozjanu, IS Director, Technical Concepts, Mundelein, IL, USA

"**B2Win** is easy to use. We use it to transfer Baan Easy-SQL queries to Excel. It simplifies the way we make statistics, e.g. for our Sales Department. By using **B2Win** we have an easy solution to create technical documents and part lists. When you have the Baan report in Word you can format and combine it with other texts. The **B2Win** software is excellent value for our money".

Peter Fiebig, Maschinenbau Kitz GmbH, Troisdorf, Germany

I have tried **B2Win** and was very impressed with the simplicity and yet functionality of the product

Sachin Danave, Senior Systems Analyst, Baan India

"We were desperate for a tool that allows us to extract data from Baan to MS-Excel in a productive way. The **B2Win** product accomplishes this in an elegant manner. We have deployed **B2Win** across our organization. It is a great product."

Oguz Erkan, VP of Operations, Edwards Systems Technology, Pittsfield, ME, USA

I have installed **B2Win** and **B2Email** for more than one company in our group. The documentation is very easy to understand and the installation process is easy as well. The Nazdaq team has done their utmost to help us with any of our questions or concerns. They were also willing to work with us to make the software more 'non-generic' and meet the customer's specific needs.

Connie Knight - Baan Administrator, SPX DataCenter, Philadelphia, PA, USA

"At OneNeck, we have implemented **B2Win** for multiple clients and they have all been very happy with the product. **B2Win** is easy to install, easy to use, and cost-effective way to get information from Baan into Word or Excel on the user's machine so the data can be manipulated, analyzed, and shared with external customers. Nazdaq's technical support for their products is excellent as well. All of our issues have been resolved quickly."

Brandon Allen, Senior Application Systems Administrator OneNeck Unified IT Solutions, Scottsdale, AZ, USA

"The finance users at Flowserve love the **B2Win** product, especially trying to reconcile ledger accounts. When you pull finalized transactions into Excel, you can really use Excel's power of doing sub-totals on transaction types, which enables you to analyze the data in an efficient way".

Manny Blits, Finance Consultant, Flowserve, Vernon, CA, USA
